PROJECTS

Transport Managment System

📅 02/2024 📍 Nashik Maharashtra

Description: A web-based application designed to streamline and optimize transportation operations. Built using **HTML**, **CSS**, and **JavaScript** for a responsive and user-friendly interface, with **PHP** as the backend for robust data handling and integration. The system enables efficient management of vehicle fleets, routes, schedules, and bookings, improving operational efficiency and reducing costs.

Pesticide And Fertilizer Website

📅 10/2024 📍 Pune Maharashtra

Description: A responsive and interactive website built with **HTML**, **CSS**, and **JavaScript**. It features a clean layout to showcase pesticide and fertilizer products, including descriptions, benefits, and application tips. The website includes interactive elements like product filtering, a contact form, and dynamic content updates for an enhanced user experience. Designed to be accessible and mobile-friendly, it serves as an essential resource for farmers and agricultural professionals.
